UPPARA VINOD

AI/ML Engineer | Full Stack Developer

Kurnool, Andhra Pradesh, India | upparavinod7@gmail.com | +91 7680841759 | GitHub | LinkedIn | Portfolio

SUMMARY

B.Tech CSE student specializing in Artificial Intelligence & Machine Learning (CGPA: 9.45/10) with hands-on experience across full-stack and machine learning application development. Experienced building React/Node.js applications, REST APIs, and Flask-based machine learning systems through multiple engineering internships.

EDUCATION

Joy University *2023 – 2027*

B.Tech CSE — Artificial Intelligence & Machine Learning | CGPA: 9.45/10

Relevant Coursework: Data Structures & Algorithms, DBMS, OOP, Web Technologies, Operating Systems

EXPERIENCE

AI & ML Intern — Azentra Global *Sept 2026 – Present*

- Working on applied AI/ML tasks, building on a foundation of Python, data preprocessing, and machine learning workflows.

Machine Learning Intern — Pantechelearning *Jul 2026 – Sept 2026*

- Built and deployed practical AI models using Python, data preprocessing techniques, and industry-standard ML libraries to solve real-world data science problems.

Junior Developer — Hyperready Technology *Jan 2026 – Apr 2026*

- Developed and maintained responsive web applications using React.js, TypeScript, and Tailwind CSS, improving frontend performance and user experience.
- Designed relational database schemas (PostgreSQL, Microsoft SQL Server) and built backend RESTful APIs and server-side logic using Node.js and SQL.

Machine Learning Intern — Unified Mentor *Aug 2025 – Sept 2025*

- Built and deployed Mobile & Vehicle Price Prediction models (Random Forest, regression) and a Flask web app for real-time predictions, using Python, Pandas, NumPy, and Scikit-learn.

PROJECTS

CodeLook — Polyglot Code Execution Platform

- Built a browser-based polyglot coding environment with Monaco Editor and a FastAPI backend, using isolated Docker environments for multi-language code execution (Python, Java, C++, JavaScript).

CareerOS AI — AI-Powered Career Intelligence Platform

- Built a full-stack career intelligence platform using React, TypeScript, Node.js, Express, and MongoDB, with JWT authentication and role-based access control.
- Developed job search, skill-gap analysis, application tracking, and analytics dashboard features, integrating LLM APIs for personalized recommendations.

3D MRI Reconstruction — Medical Imaging & 3D Reconstruction

- Built a 3D MRI reconstruction pipeline in Python using DICOM processing and trilinear interpolation, visualized with PyVista and evaluated using Dice, PSNR, and SSIM metrics.

Smart Music Player — Emotion-Aware Music Recommendation

- Built a real-time facial emotion detection pipeline (OpenCV, CNN via TensorFlow) integrated with a music recommendation workflow in a hybrid Java + Python desktop app.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs, JWT

Databases: MongoDB, MySQL, PostgreSQL, Microsoft SQL Server

AI/ML: Machine Learning, Scikit-learn, Pandas, NumPy, TensorFlow, OpenCV, Deep Learning (CNN)

Tools: Git, GitHub, Docker, VS Code, Postman

LEADERSHIP

Vice Chairperson — ACM Student Chapter, Joy University *Apr 2025 – May 2026*

- Organized and coordinated Ideathons, Hackathons, and Technical Quizzes, working with student teams and faculty to plan and execute technical programs.
